

### Clarification of the playground's initial segment

The initial segment of the playground is equipped with a starting traffic light (1), a barrier (2), a pedestrian crossing sign (3), and a stop sign (4), installed sequentially at a certain distance. In addition, before the starting traffic light (1), before the barrier (2) and before the stop sign (4) there are three right-hand stop lines A, B, C (see Figures 1, 2 and 3). The car must stop before all stop lines no closer than indicated in Figure 3.
